

Interactive sample catalog

Interactive e-catalog

A PDF that feels like a small website.

This sample is designed to test a digital e-catalog workflow: persistent header navigation, internal page jumps, external links, clear sections, and a website-like layout that remains inside the PDF.

Visit badje.ir

Mobile-friendly A4 portrait

The portrait format is easier to browse on narrow screens while still looking polished on desktop. Each page behaves like a focused website section.

Features

Built for viewing, sharing, and guiding the reader.

Every navigation item and action button in this sample is designed to behave like part of a compact website experience.

01 Internal navigation

Header items and action buttons can jump directly to other sections inside the same PDF.

Open sections →

02 External actions

Buttons can open websites, product pages, maps, contact forms, or social destinations.

Open website →

03 Fixed visual design

Layout, typography, colors, and images stay exactly where the catalog designer placed them.

Contact section →

Sections

Each page can behave like a full website section.

Use full-page sections for product stories, collections, portfolios, menus, company profiles, or calls to action.

Product or service story

Use this structure for a brand introduction, product range, restaurant menu, portfolio, project profile, or company catalog. The reader moves between sections without leaving the PDF.

Call to action

Let the catalog itself be the experience.

This final page demonstrates direct actions. In a real catalog these could point to your website, social profile, WhatsApp, a product page, or another PDF page.
